Key input sought from PAC members

- **Objectives:** What should be the objectives of the Walk and Bike Plan? What would you like to see come out of the planning process? What would constitute success for the Plan?
- **Needs assessment:** In your opinion what are the main walking- and biking-related needs and concerns in your community? What is the one thing (or two or three...) that you would do to improve conditions?
- **Outreach:** What other outreach tools and strategies should we be considering? How can you help us spread the word about the Plan and about the upcoming outreach round?
